Motion designer and 3D animator with 15+ years across broadcast, streaming, education, and social, from leading in-house motion design at **Audible** to serving as the entire VFX department for **PBS Space Time**. Equally at home as a creative lead, a collaborative teammate, or a one-person studio. I pair detailed craft in Cinema 4D and After Effects with generative AI tools to move fast without cutting corners. Often caffeinating, always creating.
